

Gamma Chapter

Mentoring Program

The mission of the Mentoring Program is to assist band directors throughout Indiana by providing consultant services, professional development assistance, and peer mentoring.

The fraternity needs your help for this Project to be successful. The Mentoring Program will provide a valuable service to band directors and expand the role that ΦBM plays in the band directing profession.

The Gamma Chapter Mentoring Program is designed to help band directors in Indiana in many ways. It might be as simple as making comments to a director as they prepare for a contest or festival or as complex as getting advice on how to effectively administrate a total band program. This all provided by some of the state's most experienced and dedicated professionals in music education.

How to request services

This can happen one of two ways. Any Indiana school band director can contact with an office or Mark Finger and request assistance. That's all there is to it.

A school principal or superintendent may make a request by contacting Mark Finger to discuss the process and how best ΦBM may be able to help.

Either of these may contact Mark Finger for an application to the ΦBM Mentoring Program.

All mentors are successful active or retired Indiana band directors who approach this work in a positive and professional manner.
